Portvigo International Export

About Us

Portvigo International Export is an international trade and export consultancy company specializing in connecting licensed manufacturers with verified international buyers. We operate as a professional export intermediary, managing the entire export process from manufacturer coordination to documentation and shipment.

Our core focus is on regulated and controlled products, where compliance, transparency, and legal procedures are critical.

Our Role & Expertise

Portvigo does not manufacture products directly. We act as an authorized export intermediary between manufacturers and overseas importers. For air rifles and related products, our responsibilities include: Manufacturer coordination and verification
Export documentation & compliance control HS code & product classification support
Commercial negotiation & order management
Logistics and shipment coordination
Post-sales communication support
This structure allows buyers to work with one professional export partner, instead of multiple suppliers.

Product Scope We currently facilitate export operations for the following product groups: Air rifles (spring, gas piston, PCP) Air gun accessories OEM / private label air rifle solutions Spare parts and maintenance components All products are supplied by licensed and legally operating manufacturers.
